

The background of the entire page is filled with dynamic, flowing swirls in shades of orange and blue. These swirls vary in size and intensity, creating a sense of movement and energy. Some swirls are thick and bold, while others are thin and delicate, resembling liquid paint or smoke.

Create your own design in a minute - www.PromoBag.Net

HOW to customize your bag?

Lining color

Strap color

PRINTING TYPE

☒ sublimation

☐ digital printing

☐ embroidery stitch

☐ SO

☐ CU

You can customize bags by changing the following elements available for the desired model: color of materials, straps, belts, zips, stitches, piping, reinforcement on the strap i.e., on the belt for carrying, and the lining too. The graphical display explains in detail how you can customize your bag for you, and those changes don't affect the price of the model.

Note: Just one article is shown on this page, and the principle of its personalization, which is applicable to all other bags according to the specification of each product (conference bags, backpacks, cases, sport bags, laptop bags, shopping bags, attache maps). Items whose modification affect the price can be: changing the dimensions of an article (whole or parts) and changing of additional elements such as lining dimension, straps, number of zips, compartments, pockets, stitches, edgings and bag thickness (reinforcement).

NYLON 600D color on the strap and on the belt for carrying
